

Content

Ewa Zimnoch-Guzowska, Waldemar Marczewski - Introduction from Editors	3
Agnieszka Hara-Skrzypiec - Evaluation of tendency to blackspot bruising and enzymatic discoloration of potato tubers	5
Dorota Milczarek, Beata Tatarowska - Evaluation of potato cultivars and breeding lines for carotenoids content in tubers	11
Dorota Sołtys-Kalina - Assessment of phytotoxic potential of potato genotypes	17
Zofia Murawska, Janusz Dębski, Katarzyna Szajko, Renata Lebecka - Isolation of proteins from potato tubers	23
Katarzyna Szajko - Isolation and identification of proteins from potato leaves	29
Zhimin Yin, Krystyna Michalak - Diagnostics of the presence of viruses in the potato and soil	37
Zhimin Yin, Krystyna Michalak, Renata Lebecka - Collection of potato viral pathogens, its validation and maintenance	57
Krystyna Michalak, Mirosława Chrzanowska - Evaluation of resistance to <i>Potato Virus Y</i> of cultivars in pre-registration (statutory) trials	63
Zhimin Yin - Methods to study the <i>PVY</i> population in the potato	71
Krzysztof Treder, Joanna Chołuj, Bogumiła Zacharzewska, Mateusz Mielczarek - Detection of <i>Potato Virus Y (PVY)</i> by reverse-transcription loop-mediated nucleic acid amplification (RT-lamp)	77
Renata Lebecka - Isolation, identification and preservation of pectinolytic bacteria pathogenic to potato	87
Renata Lebecka - Screening for potato resistance to blackleg and soft rot	97
